

TRANSPORTATION  
WORKING GROUP

The purpose of the Transportation Working Group is to evaluate, promote or enhance known transportation energy conservation opportunities for the Federal fleets which will result in permitting issuance of policy in transportation energy conservation practices for Federal agencies. Activities will encompass agency transportation modes and energy-intensive means of transport to enhance energy conserving practices and procedures in vehicle operations. The intentions are to identify opportunities for saving energy in the near term (less than one year) and further, to specify how these opportunities can be realized. The organizational entity groups of people, or person responsible for directing, supervising, and insuring (through appropriate controls) the execution of programs will be identified. Energy savings and costs will be approximated. Existing administrative constraints impeding immediate action will also be identified and recommendations made to overcome these constraints.

CHAIRMAN

Peter Glading  
Assistant Commissioner for Motor Equipment  
Office of Transportation and Public Utilities  
General Services Administration  
425 I Street, N.W. - Room 2106  
Washington, D.C. 20405
